Now that you've helped your customers improve the overall effectiveness of their financial and human resource management by implementing Microsoft Dynamics, it's time to address that growing volume of paper that's being produced, stored and recycled.

MetaViewer's 100% Paperless Automation solution tightly integrated with Microsoft Dynamics AX, Microsoft Dynamics 365 for Business Central, Microsoft Dynamics 365 for Finance, GP, NAV and SL will address the pain-points that accounting and other departments are facing and bring order to the growing chaos.

They will experience dramatically increased control over their business information and processes at significantly reduced cost.

MetaViewer provides:

- **Intelligent Capture.**
  MetaViewer's AI driven functionality intelligently recognizes key data elements, making invoice processing easier for staff and eliminates manual data-entry.

- **Intelligent Workflow.**
  MetaViewer offers Touchless Invoice Processing, featuring Robotic Process Automation (RPA) to route invoices through workflow steps – based on pre-determined rules – without human intervention.

- **Process Visibilty.**
  MetaViewer lets you monitor your financial processes in real-time, giving team members, managers and executives greater insight to cash management.

- **ERP Integration.**
  Integration is automatic. MetaViewer blends with your existing environment in perfect harmony. Combined with your ERP, MetaViewer offers a seamless, paperless

solution for your previously paper-based business processes.

- **Payment Automation**
  The ultimate time- and cost-saving toolkit that drives efficiency and streamlines processes from start to finish.

- **Spend Management**
  Real-time visibility to financial processes enables insight so you can improve your cash management, identify bottlenecks and make more strategic business decisions.

- **Enterprise Expansion.**
  Go beyond the AP department and use MetaViewer's enhanced functionality to automate other departments, including AR, HR and Legal.

About Metafile

Established in 1979, Metafile Information Systems, Inc. (www.metafile.com) is a pioneer in the invention and development of paperless document management applications serving accounts payable (AP), accounts receivable (AR) and human resources (HR) departments in middle-market and large businesses.

To date, more than 3,500 organizations worldwide have used Metafile's paperless document management solutions to capture, manage and access data, eliminate repetitive processes and promote efficiency and cost control.

Metafile's flagship product, MetaViewer, is a paperless automation solution (RPA) that is constantly developing to offer the functionality needed to meet the needs of the modern business. Increasing ROI, effectiveness, visibility and precision, solution experts are always watching the trends to assure that the features included with this state-of-the-art document management system are what end-users are looking for in order to perform everyday tasks with greater efficiency and accuracy.
